

Open up the future of “agriculture”
in Kumamoto with your idea!!

Why do not you make a new innovation to change the future of Kumamoto ?

○With the advent of IoT and robots, innovative businesses and services that could not have been thought of before are born one after another.

○In the “熊本県IoT推進ラボ”, IoT and robots will be used to challenge the creation of new innovations that will overcome challenges in the field of agriculture under the theme of “Agriculture x IoT” !

○In studying, students from the prefecture and university students will participate, and teams will work on solving problems while conducting workshops in each group !

☆This year, as an event to deepen exchanges with students gathered, we will also conduct a field experience type tour (participation fee is free) for 2 days (or 1 day), so please join us. We'll be expecting you ! 【Planned for nature-rich Aso and Amakusa】

○You can talk in both Japanese and English. Please feel free to join us !

Schedule

December

- Kick-off seminar

1 月

- Pre-seminar
- field experience type tour

2 月

- Work shop

3 月

- Results presentation
